Case Study

New build high quality residence

Design and construction of the structure and external elevations including drainage and service connections of a prestigious single dwelling on the Wentworth Estate near Virginia Water, Surrey.

The works on this ultra contemporary residence included large modus glazing, brickwork, cedar cladding and specialist render finishes to external walls.

It also comprised roof construction, waterproof finishes and aluminium windows and doors, all wrapped in a high performing thermal envelope.

We successfully fulfilled the client's brief of providing a watertight shell for the client's fit-out contractors to complete.
