

Headley Tyres

Newbury Road, Headley

Client: Linda Noelle Dunn

Architect: HFP Architects / Jim Tinlin

Civil & Structural Engineer: MJA Consulting

Duration: 40 weeks

Value: £1.2m

Case Study

Works comprised the design, supply, erection and commissioning of a new commercial building together with associated external works and services. It also included the diversion of an existing foul sewer and the construction of an access roadway on land outside the site.

Prior to commencement we had to overcome significant planning difficulties. Also there was contaminated land and asbestos issues with ground stabilisation that needed to be addressed.

- Steel framed building
- Structural concrete slab for high level bay racking
- 10 meter eaves
- Two storey internal office core
- Specialist tyre service fit out
- Large curtain walling package
